**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 10 is inconsistent with Claim 8, from which it depends, because the auxiliary prism in claim 10 is not between the total internal reflection prism and the light source, as required.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2851

4. Claims 1-6, 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Magarill (6,461,000).

Magarill discloses a projection arrangement comprising:

a light source (33)a light valve (35);

a projection lens (39);

a prism (17) for passing light from the source to the light valve and reflecting modulated light to the light valve by total internal reflection.

As best as the terms "straight pillar prism and triangular pillar prism are defined in the specification, additional prism (15) is interpreted as forming a system in combination with prism (17) or conversely as an auxiliary prism.

***Allowable Subject Matter***

5. Claims 7, 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
